

THE BEAR ESSENTIALS

TAKING PAWS TO BEAR THE NEWS

Building on our Foundation

Creativity remains key to staying fresh

More than 16 years ago Sky Bear Media partners, Jeff Barehand and Riley Gibson, met making short films. Our passion for narrative filmmaking has taken a back seat over the years to serve our client's specific needs, which are not often narrative-based. So when an interesting project comes along where we get to exercise our narrative filmmaking chops, we jump at the chance. Local actor friend Katie Gibbons needed to beef up her acting reel with a dramatic scene, so we scouted locations, got out the cinema cameras, gathered a crew, and in one weekend, filmed some amazing scenes between Katie and prominent NW actor Tony Doupe. With Riley directing and Jeff as Director of Photography, we were able to quickly film an original scene, written by Katie, to enhance her acting reel. Break legs Katie Gibbons in Hollywood!

(Above) Sky Bear CEO Jeff stands in to rehearse with actor Katie Gibbons while location scouting.

(Below) Katie gets sweaty with Hair & Make Up Artist Hillary Lucero.

(Bottom) The final scene all decked out with lights, cameras and crew and famed NW actor Tony Doupe while Sky Bear COO, director Riley Gibson mulls over the script.

The Bear's Den

Ready to Go, Ready to Film

Sky Bear is happy to be busy, and especially happy to be busy in the far reaches of our globe! From New Zealand to Alaska, from Hawaii to New York City. Like FedEx, we can get to you, next day! With Canon's smallest cinema line of cameras, we can roll two cameras deep, with audio, in just one pelican case! Often, we will have three teams "in the field" working at the same time, all while still having someone at home to ensure a timely response to our next inquiry. With 12 cameras in our arsenal, we are quick to pack and attack the airport lounge, while we wait for our next flight to our client's destination. When you've been traveling for 14 years, you kinda get it down.

Our Workhorse

The Canon EOS C70 offers exceptional cinema capabilities in a compact package. Enjoy stunning images with a 4K Super 35mm DGO Sensor and all the built-in features you could ask for, including ND Filters, mini XLRs, direct touch rotatable LCD screen, Dual Pixel CMOS Autofocus, and excellent battery life. Making the EOS C70 even more powerful is compatibility with Canon's expanding line of high-performance RF Lenses.

The Monthly GROWL

NO GROWLS!! IT'S SUNNY IN THE PNW!!!

Consider the Earth

Olympia, Washington is home to coffee, grunge, hippies, and proudly, the home of Sky Bear Media. We are happy to be part of the vibrant arts scene Olympia offers, as founders of the Olympia Film Collective, and historians when it comes to documenting events and activities that happen locally. After 14 years, we are happy to be the “go to” company in Southwestern Washington for video production. More importantly, we are a green certified-business! For Earth Day, CEO Jeff walked 11 miles to work and back, in one day! Check out the feat on TikTok: @suburbaN8tive
